Washprimer 1K CF
Including Aerosol Application

FOR PROFESSIONAL USE ONLY

Description
A one component chrome-free, self-etching washprimer that offers excellent corrosion resistance without the use of metal preps and conditioners, that is available in 1 gallon cans and convenient aerosol containers. Washprimer 1K CF, for use in the car refinishes industry, can be used for priming steel, galvanized steel and aluminum. Provides excellent adhesion and corrosion resistance of the paint systems subsequently applied.

100  Washprimer 1K CF
50   Sikkens High PerformanceReducers

Use the #1 Sikkens Measuring Stick (Black)

Spray gun set-up: Application Pressure:
1.5 – 1.8 mm 35-40 psi at the air inlet
HVLP max 10 psi at the air cap

1 x 1 coat

Recoatable after: Recoatable within:
15 minutes at 70°F (20°C) 24 hours at 70°F (20°C)

Recoatable with all Sikkens primers / surfacers / undercoats
With the exception of polyester-based products or epoxy based products and Kombi Putty.

Use suitable respiratory protection
Akzo Nobel Car Refinishes recommends the use of a fresh air supply respirator.

FOR PROFESSIONAL USE ONLY

Description
A one component chrome-free, self-etching washprimer that offers excellent corrosion resistance without the use of metal preps and conditioners, that is available in 1 gallon cans and convenient aerosol containers. Washprimer 1K CF, for use in the car refinishes industry, can be used for priming steel, galvanized steel and aluminum. Provides excellent adhesion and corrosion resistance of the paint systems subsequently applied.

Aerosol application

Ready to spray

Shake thoroughly before use
Shake for several minutes after the mixing ball has loosened

Application distance
Approximately 5”-7” (12-18 cm)

Apply 1 even coat

After application:
Invert aerosol and depress nozzle after use
This allows the propellent to clean the nozzle

Recoatable after: Recoatable within:
15 minutes at 70°F (20°C) 24 hours at 70°F (20°C)

Recoatable with all Sikkens primers / surfacers / undercoats
With the exception of polyester-based products or epoxy based products and Kombi Putty.

**Description**

A one component chrome-free, self-etching washprimer that offers excellent corrosion resistance without the use of metal preps and conditioners, that is available in 1 gallon cans and convenient aerosol containers. Washprimer 1K CF, for use in the car refinishes industry, can be used for priming steel, galvanized steel and aluminum. Provides excellent adhesion and corrosion resistance of the paint systems subsequently applied.

**Suitable substrates**

**Product and additives**

- Washprimer 1K CF
- Sikkens High Performance Reducer Fast: for spraying at temperatures of 60°F-75°F (16°C-24°C)
- Sikkens High Performance Reducer Medium: for spraying at temperatures of 70°F-95°F (20°C–35°C)
- Sikkens High Performance Reducer Slow: for spraying at very high temperatures and large objects.

**Basic raw materials**

Washprimer 1K CF: Polyvinyl butyral resins

**Surface preparation**

Remove any surface contamination prior to sanding using appropriate surface cleaner.

Existing finishes: Final sanding step P220 - P320

Steel: Sand with #P80 then #P120 grit paper dry or scuff with a red scuffing pad.
Zinc-coated steel: Sand with #P120 grit paper dry or scuff with a red scuffing pad.
Aluminum: Sand with #P150 to #P180 grit paper dry or scuff with a red scuffing pad.

Surface cleaning, remove any surface contamination prior to the application of a primer, filler/surfacer using appropriate surface cleaner.

Where bodyfiller is exposed, avoid contact with water (e.g. waterborne degreaser).

**Mixing ratio**

100 Washprimer 1K CF
50 Sikkens High Performance Reducers

- Stir the Washprimer 1K CF thoroughly before adding Reducer.

For easy and accurate mixing, use the Sikkens Measuring Stick #1 (Black)
Spraying viscosity

17-18 seconds - DIN cup #4 at 70°F (20°C)

Pot life, conventional mixing

6 months at 70°F (20°C)

At the beginning of each application, thorough stirring is recommended

</tbody>
</table>

Application

Apply one coat over bare metal substrates.

Recommended application temperature between 60°F-95°F (16°C-35°C).

Maximum relative humidity during application: 75%.

Application with aerosol can

Hold aerosol approximately 5”-7” (12-18 cm) from the panel and apply 1 even coat.

Recommended application temperature between 60°F-95°F (15°C-35°C).

Maximum relative humidity during application: 75%.

After application, invert aerosol and depress the nozzle for 2-3 seconds. This allows the propellant to clean the nozzle sufficiently for further use.

Film thickness

When using the recommended application: 0.3-0.5 mils (7-12µm)

Recoat time

Allow for a minimum of 15 minutes flash off time at 70°F (20°C) before recoating. Recoat within 24 hours at 70°F (20°C).

Washprimer 1K CF
Including Aerosol Application

Recoatable with

- All Sikkens Sikkens primer surfacers / undercoats.
- With the exception of following products:
  - Any 2K polyester bodyfiller
  - Sikkens Polysurfacers - Kombi Filler – epoxy based products
  - Sikkens basecoats

Material usage

With recommended application, the theoretical material usage is ± 54 sq.ft.liter (5 m²/liter) RTS mixture.

The practical material usage depends on many factors i.e. shape of the object, roughness of the surface, application techniques, pressure and application circumstances.

Cleaning of equipment

Sikkens Cleaning Solvent 790 or solvent borne guncleaners

VOC

(100:50) When mixed ready to spray: 6.28 lb/gal. 754 g/liter
Aerosol packaging: 6.6 lb/gal. 799 g/liter

Product storage

Product shelf-life is determined when products are stored unopened at 70°F (20°C).

- Avoid extreme temperature fluctuation.
  - One year
