High Build Surfacer Gray
FOR PROFESSIONAL USE ONLY

**Description**

High Build Surfacer is a medium grey colored primer surface based on 2K polyurethane technology. It is dedicated to fast curing high build primer surfacer for North American market for both National Rule and Low VOC markets in the US and Canada with a simple mixing ratio of 3:1 by volume.

- **3:1**
  - High Build Surfacer
  - Colorbuild Plus 250 Hardener

- **Use Sikkens Measuring Stick #4**

- **3x1**
  - HVLP Gravity
  - 0.067”–0.075” (1.7–1.9 mm)
  - 29 PSI at the spray gun air inlet
  - Max 10 psi (max 0.8 bar)

- **3-5 minutes at 70°F (20°C)**

- **3 hours at 70°F (20°C)**
  - 30 minutes at 140°F (60°C)

- **Use suitable respiratory protection**
  - AkzoNobel Car Refinishes recommends to use of a fresh air supply respirator

Basic raw materials

- High Build Surfacer: Based on hydroxylated acrylic resin and polyester resin
- Colorbuild Plus 250 Hardener: Polyisocyanate resins

Suitable surfaces

-Existing finishes, degreased and sanded with #P220 to #P320 grit paper dry.
-Steel, degreased and sanded with #P80 then #P120 grit dry.
-Aluminum, degreased and sanded with #P150 to #P180 grit dry.
-Galvanized steel, Zinc coated steel
-Autoprep Pre-Treatment Wipes
-Washprimer 1K CF after 15 minutes at 70°F (20°C).

Note: Although High Build Surfacer will provide adequate adhesion and protection if applied directly over bare steel or aluminum, for larger areas we recommend applying one coat of Sikkens etch primers or Autoprep Pre-Treatment Wipes.

Mixing ratio

- 3 parts by volume of High Build Surfacer
- 1 part by volume of Colorbuild Plus 250 Hardener
For easy and accurate mixing, use the Sikkens Measuring Stick #4

Plastic parts

For use over plastic body parts, mix High Build Surfacer as follows:

Flexible Parts:
- 90 parts by volume of High Build Surfacer
- 10 parts by volume of LV Elast-O-Actif
This will then require further mixing:
- 3 parts by volume of High Build Surfacer with LV Elast-O-Actif
- 1 part by volume of Colorbuild Plus 250 Hardener
North America

Technical Data Sheet
Primer/Surfacer

04.09.2012

High Build Surfacer Gray
FOR PROFESSIONAL USE ONLY

Spraying viscosity

The proper spraying viscosity is achieved by using the recommended mixing ratio.
20-25 sec (DIN cup #4) at 70°F (20°C).

Pot life

1 hour at 70°F (20°C)

NOTE: As with all chemically drying paints, when the hardener is introduced to the main paint product, a chemical reaction is initiated. Therefore, it is important to apply the mixed paint before the stated pot life has expired. Failure to do this may result in product performance defects.

Spray gun & pressure

<td>0.067”–0.075” (1.7–1.9 mm)</td>
<td>max. 10 psi (max. 0.8 bar)</td>
</tr>
</tbody>
</table>

Application method

Mixture A (Surfacer)

Apply 3 single coats. Allow a 3-5 minutes flash-off time between each coat or until completely mat. The number of coats depends on the film thickness desired. Allow 5-10 minutes flash-off time prior to curing.

Film thickness

2.7 mils per single coat. With the recommended application of 3 single coats, this should provide a dry film thickness of 8.0 mils prior to sanding.

Drying time

<table>
<thead>
<tr>
<th>To Sand</th>
<th>70°F (20°C)</th>
<th>100°F (38°C)</th>
<th>140°F (60°C)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>3 hours</td>
<td>45 minutes</td>
<td>30 minutes</td>
</tr>
</tbody>
</table>

Note: In extremely dry conditions, the dry time of High Build Surfacer may be slightly extended.

Sanding

Wet: May be presanded with #P400 grit paper wet, final sand with #P500 to #P600 grit wet.
Dry: May be presanded with #P240 to #P320 grit dry, moving in stages to final sanding with #P400 to #P500 grit dry.

Recoatability

High Build Surfacer can be topcoated with all Sikkens Autobase Plus or Autowave after sanding.

Cover rate

Approximately 198.4 sq. ft./liter of unmixed paint per single coat at 2.7 mils.

Notice: Do not handle until the Material Safety Data Sheets have been read and understood. Regulations require that all employees be trained on Material Safety Data Sheets for all chemicals with which they come in contact. The manufacturer recommends the use of an air supplied respirator when exposed to vapors or spray mist.
